

Project Title:

Orissa Tourism Development Website

Project Objective:

To design and develop a visually appealing, responsive, and informative tourism website for **Orissa (Odisha)** using HTML, CSS, Bootstrap, and modern front-end practices. The goal is to attract tourists, showcase cultural heritage, and promote destinations, festivals, and travel services of Odisha.

Technology Stack:

Technology	Purpose
HTML5	Structure of the web pages
CSS3	Styling and layout customization
Bootstrap 5	Responsive design and components
JavaScript	Basic interactivity and dynamic content (optional)
Google Fonts / Icons	Typography and icons for UI enhancement

Pages / Modules:

- Home Page**
 - Hero banner with background image
 - Welcome message and tagline
 - Quick links to key sections
- Popular Destinations**
 - Grid layout showcasing top tourist spots like:
 - Konark Sun Temple
 - Puri Jagannath Temple
 - Chilika Lake
 - Simlipal National Park
 - Dhuli Shanti Stupa
- Culture & Festivals**
 - Description of Odisha's rich culture
 - Highlight major festivals (Rath Yatra, Durga Puja, etc.)
 - Odissi Dance, Pattachitra art, Tribal traditions
- Gallery**
 - Responsive image gallery using Bootstrap cards or modals
- Contact Page**
 - Contact form (Name, Email, Message)
 - Map integration (Google Maps iframe – optional)

- Contact details and links to social media
 - 6. **About Us**
 - Mission & Vision
 - Government tourism body info
 - Tourism statistics or impact
 - 7. **Footer (Reusable)**
 - Social media links
 - Terms, Privacy, Sitemap
 - Copyright
-

Key Features:

- Fully responsive design (mobile-friendly)
 - Attractive UI with Bootstrap components
 - Smooth navigation with a sticky navbar
 - Image optimization for faster load times
 - Accessibility features (alt texts, contrast)
-

Design Goals:

- Warm and cultural theme reflecting Odisha's heritage
 - Vibrant yet professional color palette (reds, oranges, yellows, earthy tones)
 - Use of traditional imagery and regional icons
-

Future Scope (Optional Enhancements):

- Admin dashboard to manage content (in future using PHP/MySQL or CMS)
- Integration with booking APIs for tour packages
- Visitor feedback/testimonials section
- SEO optimization and analytics
